From the literature it is evident that the kinetic approach to analytical chemistry is rather general with several advantages over traditional equilibrium approach (Pardue, 1989, Mottola, 1988, Perez-Bendito and Silva, 1988). Essentially, kinetic methods trust the measurements of concentration changes (detected via signal changes) in a reactant ...

3. Introduction. In the late 19th century, postmortem examinations demonstrated a possible relationship between thrombotic occlusion of a coronary artery and myocardial infarction (MI). 1 However, it was not until the beginning of the 20th century that the first clinical descriptions appeared describing a connection between the formation of a thrombus in a coronary artery and its associated ...
